Professional Summary

Software Engineer with **3+ years of experience** building scalable backend systems using **Java** and **Spring Boot**, along with frontend development using **React**. Experienced in **microservices**, **REST APIs**, secure integrations, and **CI/CD pipelines** within enterprise environments. Passionate about developing **AI-powered applications** and solving real-world problems.

Skills

Languages: Java, JavaScript, SQL

Frontend: React.js, Redux, Tailwind CSS

Backend: Spring Boot, Spring Security, Hibernate

Databases: PostgreSQL, Oracle, H2

DevOps & Tools: Git, Jenkins (JULES), SonarQube, Splunk, GAIA

IDEs: IntelliJ IDEA, Visual Studio Code

Professional Experience

Accenture — Software Engineer (Oct 2024 – Present)

- Developed and maintained **Spring Boot microservices** implementing business functionalities aligned with **microservice architecture**.
- Built **mapping and validation components** for **SOAP services** transforming internal models and DTOs into structured request/response formats.
- Implemented **validation engine** using **JavaBeans introspection** enforcing field constraints and standardized error handling.
- Migrated application credentials from **CyberArk EPV Vault** to **Global Secrets Manager (GSM)** enabling centralized secrets management.
- Configured **AD Lockbox** onboarding, access policies, and GSM reference data for secure authentication.
- Contributed to **Bitbucket-based CI/CD pipelines** with **SonarQube** integration supporting **UAT** and **production deployments**.
- Monitored and troubleshooted production applications using **Splunk** and **GAIA logs**.

Accenture — Associate Software Engineer (Nov 2022 – Oct 2024)

- Developed reusable **React components** improving UI performance and maintainability.
- Managed frontend state and enhanced user experience.
- Created **JavaScript test cases** improving test coverage.
- Resolved dependency issues in **Spring Boot** applications.

Projects

Personal Portfolio Website (garymeledath.com)

- Built using **Next.js**, **React**, **Tailwind CSS**, and **Framer Motion**.
- Implemented responsive design and smooth animations.
- Deployed on **Vercel** with custom domain and DNS configuration.

- GitHub: <https://github.com/gary1116/personal-portfolio>

Speech-to-Text Audio Transcriber

- Built a web application that converts audio into text using **OpenAI APIs**.
- Implemented file upload handling, API integration, and real-time transcription display.
- Built with **React** frontend and **Spring Boot** backend.
- GitHub: <https://github.com/gary1116/Audio-Transcriber>

Spring AI Lab

- Developed a multi-feature AI application with **chat**, **recipe generator**, and **image generation**.
- Integrated **OpenAI APIs** to build intelligent and dynamic features.
- Built using **Spring Boot** and **React**.
- GitHub: <https://github.com/gary1116/spring-ai-lab>

SB E-Commerce Backend

- Developed **RESTful APIs** for product, cart, and order management using **Spring Boot**.
- Implemented **JWT authentication** and authorization using **Spring Security**.
- Designed global exception handling and standardized API response mapping.
- Integrated **PostgreSQL** and **H2** databases using **Spring Data JPA**.
- GitHub: <https://github.com/gary1116/sb-ecom>

Education

Bachelor of Engineering in Computer Science — University of Mumbai (2018 – 2022)
